Subj: Reply to The Supreme Court of Georgia's March 11, 2015 document
pertaining to "The Rules of The Supreme Court of Georgia" and other
available legal counsels

Ref: (a) The Henry County Superior case #2008-SU-CV-2714-W
The Georgia Appeals Court case #A11A2377
The Georgia Supreme Court case #S12C2017
The Newton County Attorney's office closed door meeting
(b) Thomas Brother's letter of 3-17-15 to the Georgia EPD, requesting
the status of existing permits pursuant to reference (a)
(c) Document entitled "Monetary Water without Capital Gains Taxes"

1. Out of frustration and the loss of my 34 year old registered Georgia "C" corporation resulting from reference (a) erroneous Court rulings, based on fraudulent information, and one Newton County closed door session, I have written to both the Georgia Appeals and Superior Courts many times in the recent past attempting to explain how a dishonest, fraudulently initiated 3 plus years in duration private lawsuit paid for with taxpayer funds made its way from the former law offices of the private Henry County law firm of Smith, Welch and Brittain (SWB) through 3 Georgia Courts, endorsed by one Newton County attorney's office and has now established a new Case Law whereby any private attorney can trespass, survey using or not using taxpayer funds, transfer ownership of privately owned property, without notification or monetary payment to the rightful property taxpayer owner; to a third party or new owner of said private attorney's choosing, and such clandestine, criminal, unconstitutional maneuvers be deemed "Sharp Business Practices" by reference (a) courts of law culminating with a successful, but illegal attorney/client scam of defrauding the IRS out of capital gains taxes.

RECEIVED
2015 APR 15 PM 2:49
CLERK OF SUPERIOR COURT OF GA

2. My late brother and I over in Newton County, Georgia are the victims of "Sharp Business Practices" by the aforementioned Henry County SWB law firm, said firm's solicited, pro bono client and said law firm's government agency client, the autonomous, but posthumously operated Henry County Water and Sewerage Authority (HCWSA). Prior to being blind-sided by reference lawsuit, neither my brother nor I had ever been in a Court Room, we are honest hard working, taxpaying individuals trusting in the county, state and federal governmental agencies so charged by the first amendment to the Constitution guaranteeing us all both Civil and Property Rights. Much to my amazement, from the initial court session to the last, I wondered if I was in the correct court room, for the SWB attorneys kept referring to past court cases or Case Laws that might explain and enable the Judge to currently make a favorable Summary Judgment pertaining to what said attorneys were attempting to do to the Thomas Brothers, said Brothers families and the 32 year old uncontested method using Georgia's permitted natural resources, that said Brothers had daily used to earn a living on the properties and water rights that said Brothers purchased some 32 years previously from Whitehead Die Casting Company, Ltd. (WDCCL), the former owner of 160 Snapping Shoals acres of property including the water rights, riverbed and man-made improvements.

3. However, after studying property laws for the past 3 years I can conclude that there are no Case Laws supporting attorneys misrepresenting the facts or lying to a Judge in order to win a lawsuit. Or to illegally use taxpayer funds to bribe a client into swearing to a lie about bogus ownership of 26.62 acres of said bribed clients neighbor's property; that said bribed client did not own and never paid property taxes to the respective county, but for the aforesaid law firm, simultaneously representing both parties to sell the fraudulently obtained and stolen properties to a government agency without said agency's knowledge or prior approval. Last but not least, for said SWB attorney to lie in a Court of Law about the status of a previous costly environmental study denying the aforesaid Henry County the use of the waters of the South River due to pollution, just long enough to complete the construction of a nearby \$60,000,000.00 Tussahaw Creek Reservoir while personally making millions of dollars in real estate deals from said municipal project while simultaneously representing the aforesaid government agency. These monetary escapades were followed by the aforesaid SWB law firm fraudulently selling the previously rejected South River waters and associated mail-order quitclaimed and stolen properties; having no appraisal, no survey or plat, no clear title and no Resolution from the aforesaid government agency to the aforesaid law firm to purchase any Snapping Shoals properties and water rights, to be used by Henry County for a water treatment plant, on a polluted river followed by a Court

Room codicil explained by the SWB attorney, that Henry County must now purchase, from said law firm's pro bono client, an additional 89.2 dry Henry County acres of property bordering the aforementioned 26.62 mail-order quitclaimed acres, to build a water treatment plant. It is all in the Court transcripts!

4. Pursuant to the contents of the aforementioned environmental study declaring the South River waters "off limits" for use by Henry County, the very same Henry County Superior Court that previously approved of the issuance of \$60,000,000.00 in revenue bonds to construct a nearby Reservoir; is currently the same Court that has now approved of the SWB authored and initiated lawsuit against the Thomas Brothers, taking without notice or payment, of said Brother's properties, man-made improvements and water rights, to be used as a water treatment plant for Henry County, and the selling of same by the SWB solicited, pro bono client to the Henry County Water and Sewerage Authority, for the lowly sum of \$25,000.00 thereby defrauding the federal government out of 15% capital gains taxes on what in reality is priceless properties, costing the SWB pro bono client absolutely nothing, and having a 360 foot long concrete dam, 1,000 foot long canal, head gates, state and federal water use permits and all supporting appurtenances for the production of hydroelectric power.

Going back to the December of 2007 solicitation date whereby the aforesaid attorney Welch allowed his pro bono client to agree to accept \$25,000.00 of unauthorized Henry County taxpayer monies for the aforementioned mail-order, fraudulently quitclaimed 26.62 acres of Snapping Shoals properties (clandestinely quitclaimed by SWB attorneys from 13 innocent WDCCL heirs months later in February of 2008 for SWB's pro bono client), said pro bono client had no earthly idea of the amounts, locations or identifications or which of the two counties, Newton or Henry, the mail-order quitclaimed property was located in (sold by pro bono client to un-informed HCWSA months later in March 10, 2008), hence attorney Welch's pro bono client was BRIBED, for said pro bono client did not see property or the amounts of said property, but only the color of money, all \$25,000.00 amounts and according to the pro bono client's sworn Deposition, said pro bono client took the bait and "went home", only 3 years later in 2011 to be granted, via the term of privity, by the Henry County Superior Court due to false SWB information, total immunity to any and all illegal dealings and any monetary damage to the Thomas family. However, the pro bono client failed to pay "consideration", retroactive to 1991, to all 13 WDCCL heirs, for said heir's signatures on the SWB authored mail-order quitclaim for 276.3 acres, making the mail-order quitclaim, worthless, and the courts should have ruled accordingly, for the SWB pro bono client was neither a Plaintiff, Defendant or Litigant in the SWB

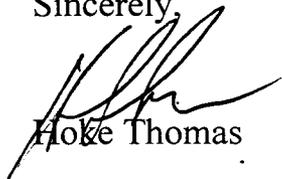

privately created lawsuit, the HCWSA vs. the innocent Newton County Thomas Brothers.

5. For these previously stated reasons, I beg your office to conduct an investigation into this entire taxpayer funded fraudulent property and natural resource transaction; all three Georgia Courts and the Newton County attorney's office to reconsider their respective decisions and send this erroneous ruling based on fraudulent SWB information back for a re-trial and this time consider the facts, not the past Case Laws that are not applicable to lying, stealing and the intentional misuse of taxpayer monies.

6. Lastly, due to the fact I have spent all my company's savings on fruitless defensive legal fees, I beg that your office or the federal government to assist in the re-hearing process. No further investigations are needed, all the proof to sustain my allegations is recorded in the transcripts of The Henry County Superior Court case #2008-SU-CV-2714-W, the testimony of the innocent Whitehead heirs or signers of the bogus quitclaim as fraudulently presented to said heirs by the aforesaid law firm on behalf of the pro bono client, recent depositions of Henry County Water and Sewerage Authority employees, recent deeds and plats of the millions of dollars in personal monetary gains made by SWB attorneys at the aforementioned Tussahaw Creek Reservoir and the deposition of the SWB solicited, pro bono client, financially sound Henry County resident, J.M. Hanger.

I rest my case and beg for assistance, not only for my business and family, but for all the citizens of Georgia now that the new property Case Law #2008-SU-CV-2714-W has been established allowing any private attorney carte blanche property and natural resource authority. With respect to reference information, for clarification and a better understanding of my present situation, I am attaching a copy of a letter dated March 3, 2105, that I recently sent to the new, bogus owner of my properties and natural resources, The HCWSA. I need help and very soon all the property owners in Georgia will also need help when private attorneys begin to use the newly established aforesaid case law and legally take without notice or payment, streambeds, natural resources, property and man-made improvements from the rightful owners and pay per reference (c) pay no capital gains taxes to the IRS.

Sincerely,

Hoke Thomas
